PROFESSIONAL OBJECTIVE

Front-End Developer | Web

SUMMARY OF QUALIFICATIONS

Front-end Developer in training at EBAC – British School of Creative Arts and Technology, pursuing a degree in Systems Analysis and Development at Cesusc. A proactive professional.

I have experience in Graphic Design, which has provided me with a solid foundation in usability, aesthetics, and user experience. This background has been essential in Front-end development, allowing me to apply UI/UX concepts to create intuitive and visually appealing interfaces. Additionally, I have acquired skills in tools such as Figma and Photoshop, which assist in prototyping and refining project designs.

I developed a portfolio website to showcase my main projects. Additionally, I participated in a school project aimed at improving the organization of the cafeteria, eliminating lines, and optimizing service. I also completed a course project where I developed a platform allowing users to sign up, create, and edit posts, enhancing my web development skills. My main programming languages include React.js, TypeScript, and CSS.

- Front-end Development Skills: React, TypeScript, CSS, Git, JavaScript, Vite, and API consumption.
- Knowledge in UX/UI Design, Systems Analysis, and Cybersecurity.
- Basic understanding of Databases, API development, and Back-end Development.

EDUCATION

- Systems Analysis and Development – Bachelor's Degree | Cesusc (08/2024 - 08/2026)
- Front-End Development – Professional Course | EBAC (08/2024 - 02/2025)
- Technical Course – High School – SESI SENAI (01/2021 - 01/2024)

LANGUAGES

- Portuguese - Fluent | English - Advanced | Spanish - Basic

PROFESSIONAL EXPERIENCE

Mega Elétron - Florianópolis - Santa Catarina

06/2024 - 09/2024

Small Business

Graphic Designer

- My experience in Graphic Design has been crucial in my work as a Front-End Developer. Creating visual identities and graphic materials taught me to apply concepts of visual hierarchy, typography, and color palettes to build attractive and brand-consistent interfaces.
- Developing layouts for digital media enhanced my ability to structure components intuitively, improving user experience. Additionally, image editing and collaboration with marketing teams reinforced my attention to detail and the importance of creating functional and visually impactful designs.

RELEVANT PROJECTS

My Portfolio

03/2025

- Portfolio developed to showcase my projects, skills, and contact information. It features a modern and responsive interface, highlighting my front-end development expertise with React and TypeScript. Includes data integration, state management, and UI/UX best practices.
- Technologies used: React, TypeScript, styled-components, React-Router, and Vite.
- Github: [Link](#)
- Website: [Link](#)

Efood (In Development)

02/2025

EBAC

- I am developing an e-commerce-style website similar to iFood, where users can explore a variety of stores, add items to their cart, enter their location, and complete payments easily and intuitively.
- Technologies used: React, TypeScript, styled-components, Redux, React-Router, and API for the database.
- Github: [Link](#)
- Website: [Link](#)

Mini Blog

02/2025

React from Zero to Mastery - Course

- Developed under the guidance of instructor Matheus Battisti, Mini Blog allows users to create accounts, publish posts, and view other members' posts, providing an interactive and dynamic experience.
- Technologies used: React, JavaScript, CSS, useContext, React-Router, and Firebase for the back-end.
- Github: [Link](#)
- Website: [Link](#)

Cantina SESI

12/2023

SESI SENAI

- As part of a five-member team, we developed an application to improve the efficiency of the school cafeteria, addressing issues with long lines and disorganization. I was responsible for front-end development, ensuring an intuitive and functional interface for users.
- Technologies used: React Native, TypeScript, CSS, React-Router, and Java for the back-end.
- Github: [Link](#)

COMPETÊNCIAS

- Development: HTML, Redux, Tailwind, Sass, Vue.
- Design & Productivity: Figma, Google Workspace, Adobe Creative Cloud, Trello.

CURSOS/ATIVIDADES COMPLEMENTARES

- React from Zero to Mastery – Udemy (01/2025 - 03/2025)
- Advanced JS and TypeScript – Udemy (2024)
- Modern JavaScript – Curso em Vídeo (2023)
- CyberSecurity – Cisco (2022)
